

PRECAST CONCRETE

CIVILS

Working within the civil engineering sector has meant working closely with the major civil engineering contractors. Our expertise covering many forms of civil engineering is delivered through our internal resources, composed of experienced employees combined with our two UK production facilities, Great Yarmouth and Dundee.

Our experience allows us to set up mobile manufacturing sites for specific projects from inception to completion.

- By adopting new technology and processes we are able to provide our clients with high quality products.
- We value engineering solutions and customer satisfaction, and are always at the forefront of our projects.

MARINE

Within the marine environment sometimes a fast and effective solution is required for; stabilising river banks, protecting riverbeds from scour, erosion control, and the powerful tidal effects across the UK.

SPS work closely with its clients to provide an environmental and economical sound solution utilising carefully selected products to service our clients project requirements.

As for all SPS products, due consideration is given to all of the issues around handling, installation and certification for use.

At SPS our quality is our strength and it goes from start to finish with every product we make. Our products have contributed to the success of many prestigious projects; multi million pound city developments, Marine projects, and building construction.

Privately owned UK based business specialises in the design and manufacture of protection and precast structures. SPS pioneered the use of concrete fleximats in the North Sea in the 1990s and has expanded its expertise, capability and product range to become one of the world's leading suppliers.

SPS brings together expert capabilities in design, manufacture and logistics. We work with our clients to provide innovative solutions and designs to cost effectively address its needs.

SPS is headquartered in Great Yarmouth, UK, manufacturing at our quayside facility and also has a permanent base in Dundee, Scotland.

To achieve this we will:

- Always comply with the law
- Operate our business to ensure proactive risk mitigation and continuous improvement
- Set goals and targets, and measure performance against them.
- Hold ourselves and our suppliers accountable to meet the highest standards.
- Communicate openly and honestly with those who may be affected by our activities.
